A Purpose Driven Business

Blue Tuna LLC was founded in 2001 and driven by a single purpose, to provide documentation and training for aviation based companies. In the past 12 years Blue Tuna has documented the start up of over 100 Part 145 Repair Stations by writing manuals and forms to meet FAA regulatory requirements.

Staying true to purpose Blue Tuna began with one course and to date we own 90 courses dedicated to training in the field of aerospace. Blue Tuna's Learning Management System (LMS) now tracks well over 1000 courses weekly to maintenance based companies around the world.

FAA Safety Team *approved*

FAASTeam

Blue Tuna LLC is a productive FAAST Team member providing over 30 AMT Awards courses listed online at the [FAA Website](http://www.faa.gov).

Blue Tuna's technical courses for the basis for many of our customer's AMT Awards credit. Beyond www.bluetunadocs.com, Blue Tuna owns and operates www.iarenewal.com Aircraft mechanics, technicians and inspectors use IA Renewal for their refresher training.

Our Customer Base

Blue Tuna's customer base is composed of aviation maintenance and production based companies they include Rolls Royce, Aviall, West Star, Saudi Aramco, British in the UK, NASA training facilities, Jet Aviation, AIRBUS Military, BIZJet International, NAAS, Hawker, Triumph University and the FAA. **IA Renewal's** customer base include the men and women mechanics, technicians and inspectors that are deployed at home and around the world. Our military is also supported by many contractors who use our courses for renewing their Inspection Authorization Certificates.

Who We Are

Terry Tolleson Ed.D is the founder of Blue Tuna and IA Renewal. As a graduate of Spartan, Dr. Tolleson's background in avionics and instrumentation provides a basis for his expertise. Terry also has an earned doctorate in Systems that contributes to his understanding of aviation based organizations.

Matt Tolleson is co-owner of Blue Tuna and has a unique set of skills. Matt's work history involves programming on the Apache Long Bow simulators and programming on Raytheon's SOPHIA. Matt's contributions to the aviation industry is invaluable.
